

Cell Coverage Mapping--Dover Campaign Survey

News Release Date
08-25-2022

Attention Dover Community Members!

The Town of Dover has partnered with Cell Coverage Mapping ("CCM") to identify where community members experience cellular coverage issues in town! This survey opportunity will run through September 30, 2022.

CCM is a crowdsourcing data analytics company that maps cellular "dead zones" and facilitates wireless solutions. CCM's web-based mapping platform allows consumers to designate cell coverage issues on an interactive blank map including dead zones, dropped calls and no cellular data, in their community.

SCAN THE QR CODE

or go to

<https://www.cellcoveragemapping.com/code/dovervt> to report where you experience dead zones in Dover.

For more information about Cell Coverage Mapping, please visit www.cellcoveragemapping.com.

Please note: Filling out the survey itself does not require disclosure of contact information. Following completion of the survey there is a prompt to voluntarily sign up for CCM updates via email which would include submission of contact information for future use.

**Dover Residents -
Are you tired of DROPPED CALLS in town?**

Report local dead zones
this month help Dover stay
connected!

**Dover Residents -
Stop dropping calls in town!**
